

Southern Academy of Periodontology

Winter Seminar 2020

January 24 - 25, 2020 Westin Charlotte, NC

The Winter Seminar includes content relevant to both our membership and referring dentists featuring Dr. Farhad Boltchi. Below is a brief synopsis, and complete biography and course description. Go to www.periodsouth.net for the full description of the course and hotel. Referring dentists accompanied by an SAP or NCSP member receive a registration discount.

Mark McIntyre, Executive Director

Farhad E. Boltchi, D.M.D., M.S.

Friday, January 24 from 1PM - 5PM (4 CE Credits)
Saturday, January 25 from 8AM - 5PM (8 CE Credits)

Dr. Boltchi received his dental degree from the Medical University of Hannover Germany and a Certificate in Periodontics associated with a Master of Science degree in Oral Biology from Baylor College of Dentistry in Dallas, Texas.

Dr. Boltchi is a faculty member of SPEAR/CerecDoctors.com, and also maintains a full-time private practice in Periodontics and Dental implants in Dallas-Fort Worth, Texas. He teaches and lectures extensively both nationally and internationally on the topics of advanced Periodontics and Dental Implants with a special emphasis on Esthetic Implant Dentistry, Periodontal Plastic Surgical Procedures, and digital implant dentistry and is also actively involved with clinical research projects in these topics. Dr. Boltchi has achieved Board Certification status with the American Board of Periodontology and is a fellow of the International Team for Implantology (ITI).

Digital Implant Dentistry - The Next Frontier

The digital revolution in dentistry is progressing rapidly. The translation of digital technologies into the clinical field of implant dentistry has resulted in new treatment modalities at the surgical and restorative level. This course will focus on the application of digital technologies in surgical and restorative implant dentistry, including digital scanners and cone beam CT scanners, and how the merging of CAD/CAM and CBCT data will culminate in a guided implant surgery technique and digital implant restorative techniques that can ultimately lead to an increased predictability and efficiency in dental implant therapy.

Course Objectives:

12 CE Credit hours, Lecture, Subject code 690

- 1.) *Demonstrate the benefits of a digital implant dentistry workflow.*
- 2.) *Understand the advantages of guided implant surgery over current freehand techniques.*
- 3.) *Outline a fully integrated digital workflow including digital implant planning, digital surgical guide fabrication, digital impressions via intraoral scanning, and digital fabrication of CAD/CAM implant restorations.*
